REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicant's arguments concerning the 112 first paragraph rejection were persuasive. In particular, applicant's discussion of how the value of the supply conductor resistor R3 affects the voltage at the Nernst electrode, which thereby affects the voltage at the Nernst reference electrode, which thereby affects the negative feedback of the pump voltage circuit, was persuasive. The examiner is withdrawing the outstanding enablement rejection.

- 2. With respect to the 112 second paragraph rejections, the amendment to claim 6 specifying the reduction of the rippling effect at a stoichiometric point renders moot the previous rejection concerning the optimization step. Applicant's canceling of claim 7 renders moot the rejection of the use of the term "maximized". The examiner is withdrawing all outstanding 112 second paragraph rejections.
- 3. Claims 6 and 8-12 are free of the prior art. In particular, claim 6 specifies a probe for determining oxygen concentration comprising a Nernst measuring and pump cell. Claim 6 further specifies the presence of a loaded voltage divider with a plurality of resistors including a joint supply conductor resistor associated with the Nernst electrode and the inner pump electrode. The closest prior art to that claimed configuration is DE 195 16 139 A1, DE 37 07 874 A1, GB 2,194,846, DE 195 39 357, and Yamada et al (USP 4,722,779). None of the these references teach, nor render obvious, the claimed configuration of the loaded voltage divider with the joint supply conductor resistor associated with the Nernst and inner pump electrode.
- 4. Applicant must submit a formal drawing of fig. 4 added to the application on 1-7-2003.

Application/Control Number: 09/554,041

Art Unit: 1753

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kaj Olsen whose telephone number is (571) 272-1344. The examiner can normally be reached on Monday through Thursday from 6:30 A.M. to 4:00 P.M. and on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen, can be reached on 571-272-1342. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
